WORK EXPERIENCE

CrowdBazaar Private Limited

Aug. 2024 – Present

Full Stack Developer.

Remote, UK

- Engineered a full-stack web platform using **Next.js (TypeScript)** and **shadcn/ui** on the frontend, with **Node.js**, **Knex.js**, and **PostgreSQL/DynamoDB** on the backend.
- **Strengthened platform security by integrating Firebase Authentication with JWT-based authorization.**
- Deployed the application through **Dockerization** for scalable and consistent production environments.
- Implemented **AWS S3** and **Cloudinary** for efficient and scalable media storage and delivery.
- Developed multi-role modules (**Vendor**, **Customer**, **Delivery Partner**, **Admin**) enabling seamless restaurant management workflows.
- Integrated **Google APIs** (Maps, Calendar, Gmail) to enable geolocation, automated scheduling, and communication.
- Set up **Stripe Marketplace** for vendor payouts and **WhatsApp API** for real-time customer interaction.
- Built a **custom ChatGPT-powered system** and integrated **Gemini API** to auto-generate visa-related documents for *Global Talent* and *Innovator Founder Visa* programs.
- Implemented **end-to-end testing** using **Puppeteer** and configured **LogRocket** for real-time user monitoring and issue tracking.
- Collaborated cross-functionally with design and backend teams to enhance **UX**, improve **system performance**, and ensure **platform scalability**.

PROJECTS

- [CodeSync](#)— Real-Time Collaborative Coding Platform
 - a. Developed a real-time collaborative code editor using WebSockets and Monaco Editor supporting JavaScript/TypeScript.
 - b. Enabled **live code compilation** in a secure sandboxed environment.
 - c. Implemented **multi-user collaboration** and persistent code storage with authentication.
 - d. Delivered an **intuitive, developer-friendly UI** optimized for performance and responsiveness.
- [Sajilo Pdf](#)— Image-to-PDF and Template Generator
 - a. Created a **static web tool** for converting images/text to PDF and managing PDF templates.
 - b. Built features for **template creation, editing, and replacement**, primarily for assignment cases.

SKILLS

- **Language and Frameworks** : TypeScript, JavaScript, Next.js, Node.js, Express.js
- **Frontend Design**: shadcn/ui, Tailwind CSS, Chakra UI
- **Database Management**: PostgreSQL, MongoDB, DynamoDB
- **Tools & Platforms**: Git, GitHub, Docker, Redis, Stripe, Vercel, Postman, AWS, GCP, Firebase, Rest API
